INDEX OF SUBJECTS

Accelerated aging—lacrimal gland. 587
Acid mucopolysaccharides—
Hurler's syndrome 1007
Acid phosphatase—leukocyte 327
Aging—lacrimal gland 587
Albinism—vascular
pseudohemophilia 283
Alkaline phosphatase—leukocyte . 327
Altitude sickness 381
Alveolar lining layer, surfactant .. 449
Aminonucleoside nephrosis 963
Amyloidosis—mouse 645
Angiopathy—diabetes 41
Antigen sequestration—
schistosome 75
Antimetabolites—lymphocyte
inhibition 1029
Antinuclear factor 465
Arterial hyperplasia—cholesterol . 825
Arterial lipogenesis—red cells 917
Asibi strain, yellow fever virus .. 501
Atherosclerosis—cholesterol 21
Atrophy—muscle 435
Auto-explanation—renal medulla . 547
Axonal change—isoniazid
neuropathy 209
Basement membranes—epithelial
origin 929
Bell, Elexious T. (In Memoriam) . 347
Blockade, reticuloendothelial 783
Bone—Fe^{59}, uptake 873
Blood transfusion—platelet
embolism 313
Brain—fluid accumulation 195
Bronchitis—crystals 337
Canine oral papilloma 849
Calcification—cardiac, magnesium
deficiency 757
Capillary—diabetes 41
Carbon tetrachloride—liver, iron
loading 129
Cardiac necrosis—9 α-fluorocortisol 633
Cardiac necrosis and calcification
—magnesium deficiency 757
Cell cultures—Japanese encephalitis
virus 519
Cerebral edema—experimental 1
Cerebral fluid accumulation 195
experimental 1
Ceroid pigmentophagia—in
albinos 283
Cholecystitis—crystals 337
Cholesterol—arterial hyperplasia .. 825
Cholesterol atherosclerosis—
thyroid influence 21
Chronic pyelonephritis—repetitive
infection 729
Coagulation process—Masugi
nephritis 653
Collagen formation—liver, iron
loading 129
Corneal dystrophy—muscular 565
Cortisone—pulmonary "epithelial"
hyperplasia 977
Cryptococcal polysaccharide
brain 1
cerebrum 195
Crystalline excrements—bronchus
and gallbladder 337
Cyst—parathyroid 251
Cytochemistry
phosphatase—leukocyte 327
thyroiditis 183
Decompression syndrome—obese
mouse 115
Deficiency, potassium—lysosome . 295
Deficiency, protein—rat liver 353
Denervation muscle atrophy 435
Dermal capillary—diabetes 41
Dermal response—vitamin A and
papain 1045
Diabetic microangiopathy 41
Diet—muscle lipochrome 599
Dog—oral papilloma 849
Dysbarism—obese mouse 115
Dystrophy
macular 565
myotonic 221
Edema, cerebral, experimental ... 1
Electron microscopy
cardiac necrosis 633; 757
cerebral edema 1
cerebral fluid 195
diabetic angiopathy 41
fibrin dissolution 805
hamster neoplasms 59
INH neuropathy 209; 679
isoniazid neuropathy 423
liver 157
liver hypoxia 533
liver, rat 353
meningiomas 835
myocardial necrosis 741
myotonic dystrophy 221
pulmonary hyperplasia 977
RES blockade 783

Electron microscopy—*Continued*
skeletal muscle 599
yellow fever virus 501
Embolism—platelet 313
Embryonic cell cultures—chicken. 393
Encephalitis, Japanese virus 519
Enzyme cytochemistry—
thyroiditis 183
Epidermoid carcinoma (HeLa tumor) 233
"Epithelial" hyperplasia—lung ... 977
Epithelial origin—basement membrane 929
Epithelium, glomerulus—aminonucleoside 963
Ethionine—liver iron 905
Excrements, crystalline—bronchus and gallbladder 337
Exorbital lacrimal gland—aging .. 587
Explanation—renal medulla 547
Fe^{59}, osseous tissue 873
Fibrin dissolution—neutrophils ... 805
Fibroblast—corneal dystrophy 565
Fluorocortisol—cardiac necrosis ... 633
Genetic obesity—mouse 115
Glomerular epithelium, amino-nucleoside 963
Goitrogen induced amyloidosis .. 645
Granuloma, schistosome 75
Guinea pig
HeLa tumor 233
thyroiditis, experimental 183
Hamsters—Simian virus 40 59
Heart
necrosis, magnesium deficiency 757
9 α-Fluorocortisol 633
papain 741
HeLa tumor—poliovirus 233
Hepatic changes—irradiated linolenic acid 889
Hepatic injury—iron and carbon tetrachloride 129
Heredity storage disease—corneal dystrophy 565
Heterologous transplant—HeLa tumor 233
Heterophil—phagocytosis 327
Hurler's syndrome—acid muco-polysaccharides 1007
Hyperplasia, arterial—cholesterol . 825
Hypoxia—liver 533
Immunofluorescence
antinuclear factor 465
yellow fever virus 501
Implantation—cryptococcal poly-saccharide—brain 195
Inapparent infection 393
Inclusions—meningiomas 835
Infection, inapparent viral 393
Infection, repetitive—pyleo-nephritis 729
Inflammation
lymphocyte inhibition 1029
vascular leakage 261
Influenzal pneumonia—mouse 95
INH neuropathy—rat 209; 423; 679
Inhibition—lymphocyte response .. 1029
Injury
hepatic—iron and carbon tetrachloride 129
thermal—inflammation 261
Interferon—Japanese encephalitis virus 519
Intestine, LIVIM virus infection. 413
Iron, liver—ethionine 905
Iron loading—collagen formation .. 129
Iron, radioactive—bone 873
Irradiated linolenic acid 889
Irradiation, ultraviolet— 889
Isoniazid neuropathy—
rat 209; 423; 679
Japanese encephalitis virus
inapparent infection 393
interferon 519
Kidney—potassium deficiency 295
Kidney aminonucleoside 963
Klemperer, Paul (In Memoriam) . 495
Lacrimal gland—accelerated aging . 587
Lead poisoning—rabbit 691
Leakage, vascular—inflammation . 261
Leukocyte, heterophil—phagocytosis 327
Lining, alveolar—surfactant 449
Lining cells, alveolar 449
Linolenic acid—ultraviolet irradiation 889
Lipochrome pigment—muscle 599
Lipogenesis, arterial—red cells ... 917
Liposomes—hepatic hypoxia 533
Liver
hypoxia 533
irradiated linolenic acid 889
protein deficiency 353
rat—partial starvation 157
Liver injury—iron and carbon tetrachloride 129
Liver iron 905
Liver iron, ethionine 905
Liver lysosomes 533
LIVIM virus—intestinal 413
Lung—"epithelial" hyperplasia 977
Lymphocyte inhibition 1029
Lymphoid tissue—runt disease 481
Lysosome—potassium deficiency .. 295
Macular corneal dystrophy 565
Magnesium deficiency—cardiac necrosis 757
Masugi nephritis—coagulation process 653
Medulla, renal—explantation 547
Membrane, basement—epithelial origin 929

Meningiomas—nuclear inclusions .. 835
Microangiopathy—diabetic 41
Microembolism—platelet 313
Monkey liver—yellow fever virus .. 501
Mouse
amyloid 645
crystalline excrements 337
influenzal pneumonia 95
LIVIM infection 413
obese, decompression 115
transplantation disease 481
Mucopolysaccharides, acid—
Hurler's syndrome 1007
Muscle atrophy—denervation 435
Muscle
dystrophy 221
lipochrome 599
Myelin sheath—isoniazid
neuropathy 423
Myocardial necrosis—papain 741
Myotonic dystrophy 221
Necrosis, cardiac
9 α-fluorocortisol 633
magnesium deficiency 757
Neoplasm—Simian Virus 40 59
Nephritis—Masugi 653
Nephrosis, aminonucleoside—
glomerulus 963
Neuropathy, isoniazid 209; 423; 679
Neutrophils—fibrin dissolution 805
Normal serum—antinuclear factor . 465
Nuclear inclusions—meningiomas . 835
Obesity, genetic—dysbarism 115
Oncolytic effect—poliovirus 233
Oral papilloma—dog 849
Osseous tissue—Fe^{59} uptake 873
Papain
dermal response 1045
myocardial necrosis 741
Papilloma, oral—dog 849
Parathyroid cyst 251
Phagocytosis—bacteria 327
Phosphatase, acid and alkaline—
leukocyte 327
Pigment—lipochrome 599
Pigmentophagia, ceriod—in
albinos 283
Platelet microembolism 313
Pneumonia, influenzal—mouse ... 95
Polymorphonuclear neutrophils—
fibrin dissolution 805
Poliomyelitis virus—oncolytic
effect 233
Polysaccharides, cryptococcal—
brain 1
Potassium deficiency—lysosome .. 295
Protein deficiency—rat liver 353
Protein loss—muscle atrophy 435
Pseudohemophilia—in albinos 283
Pseudotubercle—schistosome 75
Pulmonary—alveolar lining cells .. 991
Pulmonary "epithelial"
hyperplasia 977
Pulmonary surfactant—alveolar .. 449
Pyelonephritis, chronic—
repetitive infection 729
Rabbit
alveolar lining cells 991
lead poisoning 691
Masugi nephritis 653
Rat
isoniazid neuropathy 209; 423; 679
lipochrome 599
liver—starvation 157
protein deficiency 353
Red cells—arterial lipogenesis 917
Regeneration—INH neuropathy .. 679
Renal glomerulus—
aminonucleoside 963
Repair—INH neuropathy 679
Reticuloendothelial blockade 783
Reticuloendothelial system—
alveolar lining 991
Runt disease—mice 481
Schistosome—antigen 75
Sequestration—schistosome
antigen 75
Serum, normal—antinuclear
factor 465
Skeletal muscle—lipochrome 599
Simian virus 40—hamster
neoplasms 59
Skin, capillary—diabetes 41
Sodium phosphate and
9α-fluorocortisol 633
Starvation—liver, rat 157
Storage disease—corneal
dystrophy 565
Surfactant, pulmonary 449
Thermal injury—vascular leakage.. 261
Thyroid influence—cholesterol
atherosclerosis 21
Thyroiditis, experimental 183
Tissue culture—yellow fever virus.. 501
Toes—diabetic angiopathy 41
Transfusion—platelet embolism ... 313
Transplant, heterologous—HeLa
tumor 233
Transplantation disease—mice ... 481
Ultraviolet irradiation—linolenic
acid 889
Vascular leakage—inflammation .. 261
Vascular pseudohemophilia—in
albinos 283
Viral infection in vitro
interferon 519
Japanese encephalitis 393
Viral influenzal pneumonia—
mouse 95
Virus
LIVIM, intestinal 413
polio—oncolytic effect 233

Virus—*Continued*
Simian 40 59
yellow fever 501
Vitamin A—dermal response 1045
Vitamin A and papain 1045
Yellow fever virus—electron microscopy 501

INDEX OF AUTHORS

Afifi, A. K. See Aleu and Afifi. (August) 221

Aleu, F. P., and Afifi, A. K. Ultrastructure of muscle in myotonic dystrophy. Preliminary observations. (August) 221

Antopol, W.; Kalberer, J., Jr.; Kooperstein, S.; Sugaar, S., and Chryssanthou, C. Studies on dybarism. I. Development of decompression syndrome in genitically obese mice. (July) 115

Banson, B. B., and Lacy, P. E. Diabetic microangiopathy in human toes. With emphasis on the ultrastructural change in dermal capillaries. (July) 41

Bardawil, W. A. See Laffin, Bardawil, Pachas and McCarthy (September) 465

Barnhart, M. I. See Riddle and Barnhart (November) 805

Beals, T. F. See Pierce, Beals, Sri Ram and Midgley (December) 929

Bednář, B.; Hermanský, F., and Lojda, Z. Vascular pseudohemophilia associated with ceroid pigmentophagia in albinos. (August) 283

Benson, W. R. Acceleration of aging changes in the exorbital lacrimal gland of the female rat. (October) 587

Biggers, D. C.; Kraft, L. M., and Sprinz, H. Lethal intestinal virus infection of mice (LIVIM). An important new model for study of the response of the intestinal mucosa to injury. (September) 413

Blennerhasset, J. B. See Wolfe, Blennerhasset, Young and Cohen (December) .. 1007

Blumberg, J. M. See Howes, Price and Blumberg (October) 599

Bolande, R. P., and Klaus, M. H. The morphologic demonstration of an alveolar lining layer and its relationship to pulmonary surfactant. (September) 449

Brown, D. V. L. See Hass, Brown, Einstein and Hemmens (November) 691

Buso, R. See Casas and Buso (October) 645

Byers, S. See Friedman and Byers (November) 825

———. See Friedman and Byers (December) 917

Campbell, J. S. See Yang and Campbell (August) 337

Casas, C. B., and Buso, R. Amyloidosis in C_3H mice treated with goitrogens. (October) 645

Cheville, N. F., and Olson, C. Cytology of the canine oral papilloma. (November) 849

Cohen, R. B. See Wolfe, Blennerhasset, Young and Cohen (December) 1007

Confer, D. B., and Stenger, R. J. The evolution of lysosomes in hypoxic liver parenchyma as seen with the electron microscope. (October) 533

Cotran, R. S., and Majno, G. The delayed and prolonged vascular leakage in inflammation. I. Topography of the leaking vessels after thermal injury. (August) .. 261

Chryssanthou, C. See Antopol, Kalberer, Kooperstein, Sugaar and Chryssanthou (July) 115

D'Agostino, A. N. An electron microscopic study of cardiac necrosis produced by 9α-fluorocortisol and sodium phosphate. (October) 633

De la Huerga, J. See Kent, Volini, Minick, Orfei and de la Huerga (July) 129

Duffell, D.; Hinz, R., and Nelson, E. Neoplasms in hamsters induced by Simian virus 40. Light and electron microscopic observations. (July) 59

Einstein, R. See Hass, Brown, Einstein and Hemmens (November) 691

Fisher, E. R. Thyroidal influence on experimental cholesterol atherosclerosis. (July) 21

Friedman, M., and Byers, S. Arterial hyperplasia in the presence of various forms of cholesterol. (November) 825

———, and ———. Induction of arterial lipogenesis by red cells. (December) 917

Gallagher, R. E. See Hildenmann, Gallagher and Walford (September) 481

Garvin, P. J. See Herdson, Garvin and Jennings (August) 157

Geller, J. See Sobel and Geller (August) 183

Gonick, H. C. See Sommers, Gonick, Kalmanson and Guze (November) 729

Grossberg, S. E., and Scherer, W. F. Inapparent viral infection of cells *in vitro*.

II. An interferon produced in chicken embryonic cell cultures inoculated with Japanese encephalitis virus. (October) 519
Guze, L. B. See Sommers, Gonick, Kalmanson and Guze (November) 729
Hager, H. See Schlaepfer and Hager (August) 209
———. See Schlaepfer and Hager (September) 423
———. See Schlaepfer and Hager (October) 679
Hass, G. M.; Brown, D. V. L.; Einstein, R., and Hemmens, A. Relations between lead poisoning in rabbit and man. (November) 691
Heggtveit, H. A.; Herman, L., and Mishra, R. K. Cardiac necrosis and calcification in experimental magnesium deficiency: a light and electron microscopic study. (November) 759
Hemmens, A. See Hass, Brown, Einstein and Hemmens (November) 691
Herdson, P. B.; Garvin, P. J., and Jennings, R. B. Fine structural changes produced in rat liver by partial starvation. (August) 157
Herman, L. See Heggtveit, Herman and Mishra (November) 757
Heřmanský, F. See Bednář, Heřmanský and Lojda (August) 283
Higginson, J. See Svoboda and Higginson (September) 353
Hildenmann, W. H.; Gallagher, R. E., and Walford, R. L. Pathologic changes in lymphoid tissues in early transplantation (runt) disease in mice. (September) .. 481
Hinz, R. See Duffell, Hinz and Nelson (July) 59
Hirano, A.; Zimmerman, H. M., and Levine, S. The fine structure of cerebral fluid accumulation. III. Extracellular spread of cryptococcal polysaccharides in the acute stage. (July) 1
———; ———, and ———. The fine structure of cerebral fluid accumulation. IV. On the nature and origin of extracellular fluids following cryptococcal polysaccharide implantation. (August) 195
Horn, R. G.; Spicer, S. S., and Wetzel, B. K. Phagocytosis of bacteria by heterophil leukocytes, acid and alkaline phosphatase cytochemistry. (August) 327
Houck, J. C., and Patel, Y. M. Dermal chemical response to vitamin A and papain. (December) 1045
Howes, E. L., Jr.; Price, H. M., and Blumberg, J. M. The effects of a diet producing lipochrome pigment (ceroid) on the ultrastructure of skeletal muscle in the rat. (October) 599
Jenevein, E. P., Jr., and Weiss, D. L. Platelet microemboli associated with massive blood transfusion. (August) 313
Jennings, R. B. See Herdson, Garvin and Jennings (August) 157
Jones, W. A. See Waravdekar, Saslaw and Jones (December) 889
Kalberer, J., Jr. See Antopol, Kalberer, Kooperstein, Sugaar and Chryssanthou (July) 115
Kalmanson, G. M. See Sommers, Gonick, Kalmanson and Guze (November) 729
Kaufman, N.; Klavins, J. D., and Kinney, T. D. Sequence of deposition and loss of stainable iron in the liver during ethionine administration. (December) ... 905
Kent, G.; Volini, F. I.; Minick, O. T.; Orfei, E., and de la Huerga, J. Effect of iron loading upon the formation of collagen in the hepatic injury induced by carbon tetrachloride. (July) 129
Kinney, T. D. See Kaufman, Klavins and Kinney (December) 905
Klaus, M. H. See Bolande and Klaus (September) 449
Klavins, J. D. See Kaufman, Klavins and Kinney (December) 905
Klintworth, G. K., and Vogel, F. S. Macular corneal dystrophy—an inherited acid mucopolysaccharide storage disease of the corneal fibroblast. (October) 565
Kohn, R. R. Mechanism of protein loss in denervation muscle atrophy. (September) 435
Kooperstein, S. See Antopol, Kalberer, Kooperstein, Sugaar and Chryssanthou. (July) 115
Kraft, L. M. See Biggers, Kraft and Sprinz (September) 413
Lacy, P. E. See Banson and Lacy (July) 41
Laffin, R. J.; Bardawil, W. A.; Pachas, W. N., and McCarthy, J. S. Immunofluorescent studies on the occurrence of antinuclear factor in normal human serum. (September) 465
Leveque, L. J. See Muirhead, Schneider, Zydeck and Leveque (October) 547

Levine, S. See Hirano, Zimmerman and Levine (July) 1
———. See Hirano, Zimmerman and Levine (August) 195
Lichtenberg, F. v. Studies on granuloma formation. III. Antigen sequestration and destruction in the schistosome pseudotubercle. (July) 75
Lojda, Z. See Bednář, Heřmanský and Lojda (August) 283
Majno, G. See Cotran and Majno (August) 261
Manuelidis, E. E. See Pond and Manuelidis (August) 233
Margaretten, W. See Wiener, Spiro and Margaretten (November) 783
McCarthy, J. S. See Laffin, Bardawil, Pachas and McCarthy (September) 465
McCluskey, R. T. See Vassalli and McCluskey (October) 653
McGavran, M. H., and White, J. D. Electron microscopic and immunofluorescent observations of monkey liver and tissue culture cells infected with the asibi strain of yellow fever. (October) 501
Midgley, A. R., Jr. See Pierce, Beals, Sri Ram and Midgley (December) 929
Minick, O. T. See Kent, Volini, Minick, Orfei and de la Huerga (July) 129
Mishra, R. K. See Heggtveit, Herman and Mishra (November) 757
Moore, R. D., and Schoenberg, M. D. Alveolar lining cells and pulmonary reticuloendothelial system of the rabbit. (December) 991
